Subject: Microsoft Settlement

Please move forward with the Microsoft settlement. The lack of a settlement is destructive to all of our businesses. When you think of the legal wrangling and the lack of focus inherent in a situation such as this, it is apparent that the real losers are the smaller companies and consumers.

As a business owner, I want Microsoft, Oracle, Sun, etc.. concentrating on improving their products and services rather than attending to legal needs that ultimately help no one other than the legal profession.

Thak you,

Fred West
